ELECTRICITY AUTHORITY OF CAMBODIA

REPORT ON POWER SECTOR OF THE KINGDOM OF CAMBODIA 2010 EDITION

Compiled by Electricity Authority of Cambodia from Data for the year 2009 received from Licensees

PREFACE

The Annual Report on Power Sector of the Kingdom of Cambodia, 2009 Edition is compiled from informations for the year 2009 received from licensees, MIME and other organizations in the power sector. This report is for dissemination to the Royal Government, institutions, investors and public desirous to know about the situation during the year 2009 of the power sector of the Kingdom of Cambodia.

This report is compiled from information collected by EAC and information taken from licensees' annual summary report on their activities during the Year 2009. Till the end of year 2009, 249 licensed electricity service providers share more than 99% of power market in the kingdom of Cambodia. Among them EDC, the distribution licensees, the licensees supplying electricity in provincial towns and other big towns manage the service well, and keep their operational records to the required level of quality. Most of the small licensees supplying electricity in rural areas, are improving the level of management of their operation, still there may be inaccuracies in their data record. However as the power market share of this group of licensees is small (less than 2%); this will not materially affect the overall accuracy of the data furnished in this report. However, EAC gives special attention to the collection of the data done by it from these licensees and trains them to record the required data correctly as the data is important in assessing the real situation of rural electrification.

Any comments or suggestions from Royal Government, instutions, investors or public are welcome and will be considered by EAC to publish more useful reports in future reflecting the actual situation of the sector.

EAC expects that this report will be a valuable document for the information for the year 2009 on the power sector of the Kingdom of Cambodia.

Chairman
Electricity Authority of Cambodia

TY NORIN

CHAPTER 1

Basic Law and Regulations in Power Sector Management in the Kingdom of Cambodia

1.1 Electricity Law of the Kingdom of Cambodia

Under the framework of reform in power sector, Royal Government of Cambodia has established the Electricity Law of the Kingdom of Cambodia in order to open for and attract private investors to participate in the development of the power sector in the Kingdom of Cambodia. The Electricity Law of the Kingdom of Cambodia was adopted by National Assembly on November 06, 2000 at the plenary session No.5 of term 2, agreed by the Senate on the form and content of the law on December 13, 2000 at the plenary session No.4 of term 1 and announced to be consistent with the Constitution by the Constitutional Council on January 15, 2001. The Law was finally promulgated by ROYAL DECREE No. NS/RKM/0201/03 dated February 02, 2001 by Preah Bath Samdech **Preah Norodom Sihanouk**, King of Cambodia.

In preparation of a framework for the electric power supply and services throughout the Kingdom of Cambodia, the Law provides for the establishment of an institution called "Electricity Authority of Cambodia", a legal public entity, being granted the right by the Royal Government to be an autonomous agency to regulate the power sector in the Kingdom of Cambodia.

The Electricity Law provides that the Electricity Authority of Cambodia shall consist of 3 Members, including the Chairman. The Chairman and Members shall be designated and proposed by the Prime Minister and shall be appointed by Royal KRET. Each Member shall have a 3 (three) years term, which shall be staggered so that the term of the initial members shall expire at different times.

As per the Electricity Law of the Kingdom of Cambodia, "no person may operate as an electric power utility or provide electric power services unless he/she has performed under and in accordance with the terms of a valid license issued by the Authority. Any person, who is operating as an electric power utility at the time of promulgation of the Electricity Law, shall apply to the Electricity Authority of Cambodia for a license within 6 month of receiving the initial notice from the Authority".

Regulations, orders and decisions issued by the Electricity Authority of Cambodia are enforceable as per the Electricity Law. Electricity Authority of Cambodia is competent to file complaints in the courts of the Kingdom of Cambodia for any violation of the Electricity Law or the regulations, orders, decisions as well as licenses issued by EAC.

The Law also provides for the rights, obligations and penalty on the service providers as well as the consumers in order to establish fair condition in the business and the use of electricity.

The enactment of the Electricity Law of the Kingdom of Cambodia is a big leap forward in bringing reforms in the electricity sector. This reform will encourage the private investors to invest in the power sector in a fair, just and efficient manner for the benefit of our society.

1.2 Responsibilities of Ministry of Industry, Mines and Energy and Electricity Authority of Cambodia in Power sector

Article 3 of the Electricity Law of the Kingdom of Cambodia defines the responsibility of Ministry of Industry, Mines and Energy and Electricity Authority of Cambodia separately. As per the provisions of this article, after EAC has started its operation, the governing of the power sector in the Kingdom of Cambodia shall be bifurcated, 1-the Ministry of Industry, Mines and Energy shall be responsible for setting and administrating the government policies, strategies and planning in the power sector and 2-the Electricity Authority of Cambodia shall ensure that the provision of services and the use of electricity shall be performed efficiently, qualitatively, sustain ably and in a transparent manner.

It means that, the Ministry of Industry, Mines and Energy, through its duty for setting and administering the government policies, strategies and planning in the power sector, is the institution of the Royal Government to chalk out the path that power sector of the Kingdom of Cambodia is going to take. This institution is also responsible for setting the technical standards for the power sector.

EAC is responsible to issue rules, regulations and procedures and also is responsible to monitor, guide, coordinate including requiring the operators in power sectors both suppliers and consumers to follow the policy and guidelines and technical standards issued by Ministry of Industry, Mines and Energy and ensure that the provision of services and the use of electricity shall be performed efficiently, qualitatively, sustain ably and in a transparent manner.

The roles of the two organizations in governing power sector in the Kingdom of Cambodia as provided in the Electricity Law of the Kingdom of Cambodia is shown in the following diagram:

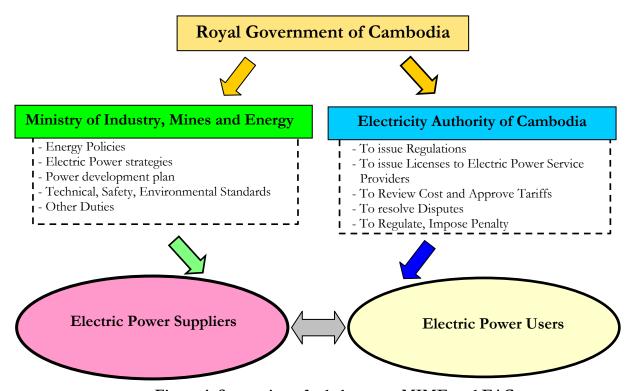

Figure 1: Separation of role between MIME and EAC

1.3 Duties of the Electricity Authority of Cambodia in the Power sector

1.3.1 Regulation of the Electric Power Services

Providing Electric Power Services mean the business of providing electric power services. Electricity Law of the Kingdom of Cambodia has granted the right and autonomy to EAC to regulate the activities of these services in order to ensure that the services and the business of the electric power service providers are actually carried out efficiently, qualitatively, sustain ably and in a transparent manner. Granting the right and autonomy to EAC to regulate these services does not mean that Law has provided for EAC to get involved in or to manage the internal business of the electric power service providers. But it allows EAC to advise, guide or direct the service provider, to modify or cease such activity which affects the service being performed efficiently, qualitatively, sustainable and in a transparent manner. The guiding action or direction to revise or cease any activity is to be carried out in public interest and to protect the interest of the consumers.

1.3.2 Governance of relation between Delivery, Receiving and Use of Electricity

The relation between Delivery, Receiving and Use of Electricity means the relation between generators and transmitters, between generators and distributors, between transmitters and distributors or between suppliers and consumers. These relations relate only to the cycle of delivery, receiving and use of electricity. The relations can cover the conditions of delivery and receiving electric power services between above parties; the obligations and rights of the above parties in delivery and receiving electric power services; the cost of electric power services that one party pays to the other party; the quality of electric power services that one party provides to other parties etc.

Electric Power Services mean services in electricity sector provided by one party to other parties. Electric power services does not only mean provision of "Electricity" by suppliers to the consumers or the generation, transmission or distribution services provided by one service provider to other service providers but can be any electricity work such as the installation of electrical equipments and network, operation and maintenance, the services in relation to providing the electric power services, the implementation of any work of electric power services etc., which one electric service provider delivers to other electric service providers or to consumers.

The Electricity Law of the Kingdom of Cambodia has granted the right and autonomy to EAC to govern these relations between the Delivery, Receiving and Use of Electricity.

1.3.3 Powers and Duties of Electricity Authority of Cambodia

According to the Article 7 of Electricity Law of the Kingdom of Cambodia, EAC has the following powers and duties:

- (a) To issue, revise, suspend, revoke or deny the licenses for the provision of electric power services as provided in article 29 of the Law;
- (b) To approve tariff rates and charges and terms and conditions of electric power services of licensees, except where the Authority consider those rates or charges and terms and conditions are established pursuant to a competitive, market-based process;

- (c) To enforce regulations, procedures and standards for investment programs by licensees;
- (d) To review the financial activities and corporate organization structure of licensees to the extent that these activities and organization directly affect the operation of the power sector and the efficiency of electricity supply;
- (e) To approve and enforce the performance standards for licensees;
- (f) To evaluate and resolve consumer complaints and contract disputes involving licensees, to the extent that the complaints and disputes relate to the violation of the conditions of license;
- (g) To approve and enforce a uniform system of accounts for all licensees;
- (h) To prepare and publish reports of power sector and relevant information received from licensees for the benefit of the Government and the public;
- (i) To prescribe fees applicable to licensees;
- (j) To determine the procedures for informing the public about its activities within its duties, in order to ensure that the Electricity Authority of Cambodia complies with the principle of transparency as set forth in Article 3 of this law;
- (k) To issue rules and regulations and to make appropriate orders, and to issue temporary and permanent injunction for electric power services;
- (l) To impose monetary penalty, disconnect power supply, suspend or revoke the license for the violations of this Law, standards and regulations of the Electricity Authority of Cambodia;
- (m) To require the electric power service providers and the consumers to obey the rules relating to the national energy security, economic, environmental and other Government policies;
- (n) To perform any other function incidental or consequential to any of the duties as describes above; and
- (o) To establish the terms and conditions of employment of the officers or employees including experts/advisors of Electricity Authority of Cambodia.

1.3.4 Legal Documents for Governing and Regulating Electric Power Services and use of Electricity

The Legal Documents for governing and regulating electric power services and use of electricity in the Kingdom of Cambodia are classified in Table 1 below:

Table 1: Legal Documents for Governing and Regulating Electric Power Services and use of Electricity

1 Law	The Electricity Law of the Kingdom of Cambodia and other Laws						
	to manage and regulate the power sectors. Laws are main						
	documents in regulating all activities in power sector and also the						
	main base for preparation of other legal documents needed for						
	managing and regulating the power sector.						
2 Legal Documents	Sub-Decree, Decision, Notification etc. of the Royal						
of Government	Government. These documents are for determining the power						
Class	sector policy and for regulating the activities in power sector and						
	are issued by the Royal Government under the provisions of the						
	Electricity Law. The main principles of the power sector, which						
	are not defined in the Law, can also be issued for application as a						

	standard document of the Royal Government.
3 Legal Documents	Declaration (Prakas) and Decisions of the Ministry of Industry,
of Ministry Class	Mines and Energy. These are the documents for managing the works, which are under the duties of Ministry of Industry, Mines and Energy such as policy, development, planning, strategy, technical standards and other determinations in power sector such as: - Investments in the rehabilitation and development of power sector in the short, medium and long term; - Restructuring, private sector participation and privatization of Public Utilities;
	 Promotion of the use of indigenous energy resources in the generation of electricity; Planning and agreements on the export and import of electricity; Subsidies to specific classes of customers and priorities regarding consumers of electricity; Promotion of efficiency in generation, transmission, distribution and consumption of electricity and action taken to create a Comprehensive Electricity Conservation Program for Cambodia; and Electricity sector emergency and energy security strategies.
4 Legal Documents of EAC	Licenses, regulations, procedures and decisions of Electricity Authority of Cambodia (EAC), which are issued by EAC under the framework of the Electricity Law. These documents are for managing and regulating the electric power services and the use of electricity in the Kingdom of Cambodia.

The legal documents prepared and put into force for managing and regulating provision of services and use of electricity in the Kingdom of Cambodia up to the end of the year 2009 are shown in the table 2 below:

Chapter 2 Information on Electricity Authority of Cambodia the Regulator for the Power Sector in the Kingdom of Cambodia

CHAPTER 2

Information on Electricity Authority of Cambodia – the Regulator for the Power Sector in the Kingdom of Cambodia

2.1 Regulator in Power Sector

According to the Electricity Law, the Electricity Authority of Cambodia (EAC) shall consist of 3 (three) members. The members of EAC shall be designated and proposed by the Prime Minister and shall be appointed by the Royal KRET. During the year 2009, the regulators for the power sector, appointed by the Royal KRET, are as follows:

- 1. **H.E. Dr. Ty Norin**, Chairman
- 2. **H.E. Yao Bunmeng**, First Vice-Chairman
- 3. **H.E. Sam Oeun Kim Hoeun**, Second Vice-Chairman

2.2 Organization of Electricity Authority of Cambodia

As provided by Electricity Law, EAC shall consist of three members and shall have one secretariat for assistance. This secretariat shall be headed by an Executive Director. The Executive Director shall be appointed by Chairman of EAC after consulting with other members.

At present, EAC has its organization structure as per the schematic diagram below. The highest authorities of EAC are the three regulators i.e. the chairman of EAC and the two vice-chairmen. Under the chairman and vice-chairmen, there is one secretariat headed by the executive director. Secretariat provides support to EAC for administrative and technical works and controlling the specialized departments under it. This secretariat consists of four departments for performing the works in their specialized fields separately and they are 1 – Department of Administration and Personnel, which is in charge of administration and personnel works; 2 – Department of Electricity Regulation, which is in charge of electricity technical works; 3 – Department of Financial and Pricing, which is in charge of financing, accounting and analyzing the electricity tariff works; and 4 – Department of Legislation, which is in charge of Legal works and resolution of dispute and imposition of fines.

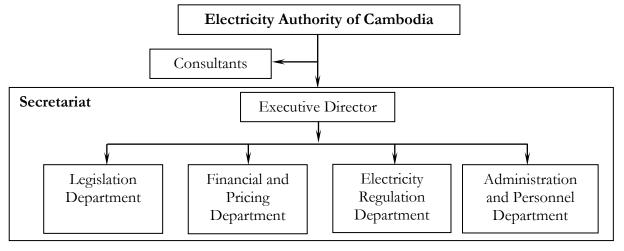

Figure 2: Organization chart of EAC

2.3 The Budget of EAC and License Fees

The Electricity Authority of Cambodia is an autonomous agency working for the interest of all electric power service providers and electricity users in the Kingdom of Cambodia. Therefore the expenditure of EAC for its operation is to be borne by all electric power service providers in the form of payment of license fees. Article 27 of the Electricity Law provides that EAC shall have an autonomous budget for its operation. This budget shall come through License Fees paid by applicants and licensees as determined by EAC. For governing the license fees charged by EAC, The Electricity Law has further provisions that "The maximum license fees are to be determined by a Sub-Decree of the Royal Government".

Under the provisions of the Electricity Law of the Kingdom of Cambodia, the Royal Government have issued sub-decree No. 131-OR-N-KR/BK dated December 27, 2001 determining the maximum license fees applicable to the electric power service providers in the Kingdom of Cambodia.

According to Electricity Law, EAC shall determine the rate of the license fees to be paid by the licensees every year based on the maximum license fees determined by the sub-decree. For the year 2009, EAC has determined the license fees to be paid by licensees vide Notification No. 044SR-09-EAC dated March 16, 2009; which made no change in the License Fee of 2008. The license fees determined for the years 2007 to 2009 are given in Table 3 below.

Riel per kWh Type **Year 2007 Year 2008 Year 2009** Generated or Power Purchased from any other 1.40 1.30 1.30 Country Transmission 0.50 0.50 0.50 0.70 Distribution and Sale 0.60 0.60 0.40 0.30 Retail 0.30 Other services license fee 0.1%0.1% 0.1%

Table 3: License Fees to be paid by Licensees

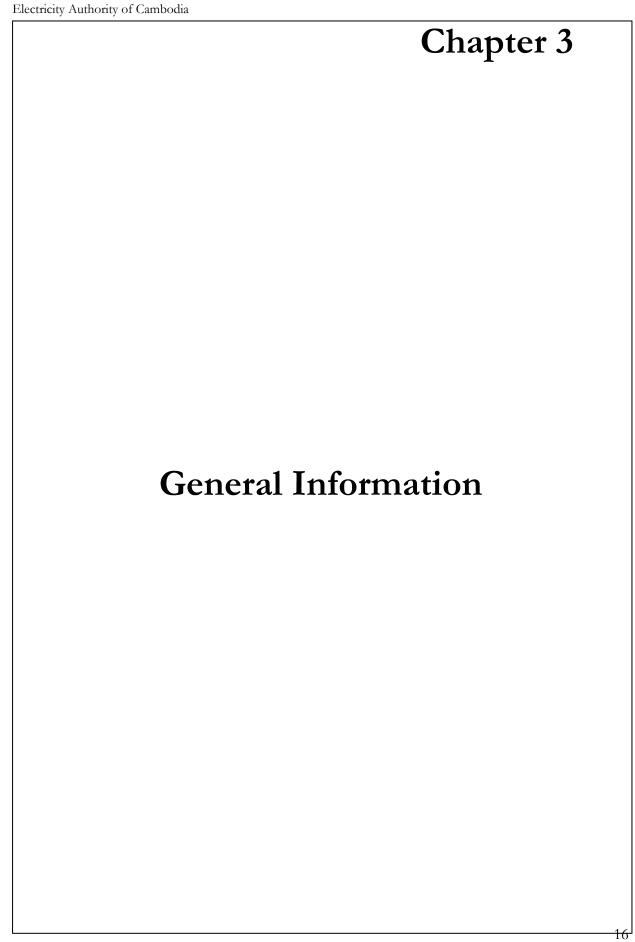

2.4 Financial Statements of EAC

The Electricity Law provides that the annual financial statement, together with the accounting books of the Authority and related records shall be audited by auditor and inspected by the National Audit Authority. Within 1 (one) month after auditing, the Authority shall submit all reports to the Prime Minister for approval, and shall publish the approved reports to the public. The audited income statement of Electricity Authority of Cambodia for the years 2007 and 2008 is given below.

CHAPTER 3 General Information

3.1 Introduction

The Kingdom of Cambodia, a member country of the Association of South East Asian Nations (ASEAN), with an area of 181,035 square Kilometers, is situated in the Lower Mekong region. Its neighboring countries are Thailand in the West, Vietnam in the East and Laos in the North. In Cambodia 80.5% of population live in rural areas where the rate of electrification is low. The rural electrification strategy sets the goal: by year 2020 all villages have access to electricity of at least one of different forms, including access to mini-grid and off-grid electricity. Potential of hydropower in Cambodia is high (more than 10,000 Megawatts) and has more certainty of development compared to other energy resources like petroleum and gas whose development is in the initial stages at present. To ensure a sustainable development of power sector Royal Government of Cambodia worked out an electrification master plan, which provides for (1) electricity generation development including hydropower resources development and development of coal or gas power plant, (2) electricity import to coordinate the development of the border zones of the Kingdom and (3) the development of transmission grid throughout the country in order to establish the electricity transmission system of Cambodia.

3.2 Developments in Power Sector till 2009

3.2.1 Extension of Grid Supply to new areas

During 2009, Grid supply was strengthened and extended to new areas by commissioning of 230 kV lines and substations and extension of 22 kV sub-transmission systems. The major developments in extension of grid supply in 2009 are as follows:

- 1. Commissioning of 230 kV line from Vietnam border to Takeo and Takeo to Phnom Penh and grid substations at Takeo and Phnom Penh. Cambodia imported power over this line up to 100 MW. With this, EDC terminatedthe high cost diesel generation PPA with SHC (Cambodia) International Pte Ltd for purchase of power at Phnom Penh. 22 kV feeders were commissioned at Takeo and Phnom Penh to extend the grid supply to more areas in provinces of Takeo, Kandal and Kampong Speu and to strengthen the Phnom Penh System.
- 2. The 22 kV sub transmission systems in Battambang, Banteay Meanchey and Siem Reap were strengthened and expanded to supply more consumers and some rural areas.
- 3. One more connection point for Import of power from Vietnam at 22 kV was added in Takeo province. Imported power supply from Vietnam at 22 kV was extended to more areas.
- 4. With the expansion of 22 kV sub-transmission system from Kampong Cham provincial town, the supply from Kampong cham system was extended to more areas.

3.2.2 Strengthening and expansion of Isolated supply Systems

In addition to the expansion of Grid supply, schemes were undertaken to strengthen and expand isolated supply system to cover new areas. Many licensees installed new MV system or expanded MV system to cover larger area of supply and to improve the quality of supply..

The licensees have taken action to improve their facilities following advice and suggestion from EAC in order to increase economic efficiency of their generation facilities and distribution facilities and on this basis have received right to provide electricity service for longer term.

3.3- Projects finalized and under implementation

The following power supply development plans are finalized and at the end of 2009, are at different stages of implementation:

Project 1: Upgrading capacity of 115 kV system in Phnom Penh

Scheduled Year of operation: 2009

Scope: 1) Add 2 circuit of 115 kV line from WPP substation to existing 115 kV system of Phnom Penh, 2) Add second circuit to the existing 115 kV line connecting substations in Phnom Penh, 3) Deviate 115 kV line from Kirirom Hydro Power Plant to WPP substation, 4) Modification of substation GS1 and connection of 10 MVAr reactive compensation on 22 kV side 5) Add one transformer 115/22kV 30/50 MVA at GS2 substation and connection of 15 MVAr reactive compensation on 22 kV side 6) Add one transformer 115/22 kV 30/50 MVA at GS3 substation and connection of 15 MVAr reactive compensation on 22 kV side. All these works are being done to upgrade transmission and distribution capacity of Phnom Penh power supply system and to receive electricity from Vietnam and new power plants.

Implementer: EDC under WB loan, Major work completed

Project 2: Construction of 230 kV transmission line connecting Phnom Penh, Takeo and Vietnam including substations at WPP and Takeo

Scheduled Year of operation: 2009

Scope: Build substations at West Phnom Penh (WPP) and Takeo and 230 kV transmission line connecting Phnom Penh to Takeo and to Vietnam in order to purchase electricity from Vietnam.

Implementer: EDC under ADB loan. Major work completed

Project 3: Construction of 22 kV sub-transmission lines in the provinces of Takeo, Phnom Penh, Kampong Speu, Kampot, Sihanouk ville and Battambang

Scheduled Year of operation: 2009, 2010, 2011

Scope: Construction of 22 kV sub-transmission lines in the provinces of Takeo, Phnom Penh, Kampong Speu, Kampot, Sihanouk ville and Battambang to take the grid supply to areas around the grid substations

Implementer: EDC under WB, ADB and other loans. Work in progress

Project 4: Build National Dispatching Center

Scheduled Operation year: 2011

Scope: Build National Dispatching Center in Phnom Penh in order to manage all connected power supply systems in the country.

Implementer: EDC under WB loan. Bidding in progress

Project 5: Build 230 kV line connecting Takeo to Kampot and substation in Kampot provincial

Scheduled Operation year: 2011

Scope: Build 230 kV transmission line connecting Takeo and Kampot, and build 230 kV substation at Kampot provincial town in order to connect Kamchay Hydro Power Plant to the grid system.

Implementer: EDC, KFW gives grant to RGC and RGC give this grant to EDC as loan to implement the project. Bidding in progress

Project 6: Build 230 kV line connecting Kampot to Sihanoukville and substation in Sihanoukville

Scheduled Operation year: 2011

Scope: Build 230 kV transmission line connecting Kampot and Sihanoukville, and build 230 kV substation at Sihanoukville in order to connect Coal Fired Power Plant at sihanoukville to the Grid system.

Implementer: This project is under joint loan of ADB and JBIC and EDC is implementer of the project. Work in progress

Project 7: Build 193 MW Kamchay Hydro Power Plant and transmission line connecting KHPP to Kampot substation

Scheduled Operation year: 2011

Scope: Build 193 MW Kamchay Hydro Power Plant and transmission line connecting this power plant to substation in Kampot provincial town in order to sell electricity to EDC.

Implementer: The investment for this project is by SINOHYDRO from People's Republic of China, who received special investment concession from RGC. Work in progress

Project 8: Build 18 MW Kirirom III Hydro Power Plant and transmission line connecting Kirirom III plant to Kirirom I substation

Scheduled Operation year: 2012

Scope: Build 18 MW Kirirom III Hydro Power Plant and transmission line connecting Kirirom III plant to Kirirom I substation in order to sell electricity to EDC.

Implementer: This project is the second phase of investment of Chinese company CETIC from People's Republic of China, who built Kirirom I Hydro Power Plant in the first phase. This project is in the same concession package with Kirirom I Hydro Power Plant. Work in progress

Project 9: Development of Stung Atay Hydro Power Plant, Common switching substation at Ou Saom and 230 kV transmission line connecting switching substation and Pursat substation.

Scheduled Operation year: 2012

Scope: Build 120 MW Stung Atay Hydro Power Plant, common switching substation, transmission line connecting this plant to common switching substation and 230 kV line connecting common switching substation to substation at Pursat provincial town.

Implementer: This project is under private investment and is being implemented by C.H.D (Cambodia) Hydropower Development Co., Ltd Work in progress

Project 10: Build 230 kV transmission line connecting Phnom Penh, Kampong Chhnang, Pursat and Battambang with substations at Kampong Chhnang, Pursat and Battambang

Scheduled Operation year: 2012

Scope: Build 230 kV transmission line connecting Phnom Penh, Kampong Chhnang, Pursat and Battambang and build substations near Kampong Chhanang, Pursat and Battambang in order to connect southern zone system with western zone system to become one system.

Implementer: This project is being implemented by Cambodian Power Grid Co. Ltd under private investment.

Present Position: The Transmission agreement and IA have been signed. Work in progress

Project 11: Build 100 MW Coal Fired Power Plant in Sihanoukville and transmission line connecting this plant to Sihanoukville substation

Scheduled Operation year: 2013

Scope: Build 100 MW Coal Fired Power Plant (operated on imported coal) and transmission line connecting this plant to Sihanoukville substation.

Implementer: The investment for this project will be by the private company Cambodian Energy Limited on the BOO basis.

Present Position: The PPA, IA and Novation Agreement have been signed. Financial closing is achieved.

Project 12: Build Stung Tatay Hydro Power Plant and transmission line to common switching substation.

Scheduled Operation year: 2013

Scope: Build 246 MW Stung Tatay Hydro Power Plant and transmission line connecting this plant to common switching substation.

Implementer: The project is being implemented by Cambodian Tatay Hydropower Limited (CTHL).

Present Position: The PPA and IA have been signed. Preparation to start the work in progress

Project 13: Build Lower Stung Russey Chrum Hydro Power Plant and transmission line to common switching substation.

Scheduled Operation year: 2014

Scope: Build 338 MW Lower Stung Russey Chrum Hydro Power Plant and transmission line connecting this plant to common switching substation.

Implementer: The project is being implemented by China Huadian Lower Stung Russei Chrum Hydroelectric Project (Cambodia) Co., Ltd (CHDPC).

Present Position: The PPA and IA have been signed. Preparation to start the work in progress

Project 14: Build 230 kV transmission line connecting Phnom Penh to Kampong Cham and new grid substation in Kampong Cham provincial town

Scheduled Operation year: 2012

Scope: Build NPP sub station in Phnom Penh, and 230 kV transmission line connecting NPP to Kampong Cham provincial town and build substation in Kampong Cham provincial town in order to connect southern zone system with power supply system in Kampong Cham area together into one system.

Implementer: This project is being undertaken in private sector by Cambodia Transmission Limited (CTL).

3.4- Projects planned and under different stages of implementation

The following power supply development projects are planned and at the end of 2009 are at different stages of planning:

Project 15: Build 115 kV line connecting Kampong Cham to Suong and Kraek towns and to Vietnam power system

Scheduled Operation year: 2011

Scope: Build 115 kV line connecting Kampong Cham, Suong, Kraek and Taininh in Vietnam and build 115 kV substations at 3 places, 1) in Kampong Cham provincial town, 2) in Suong town and 3) in Kraek town in order to import electricity form Vietnam to supply all above areas.

Implementer: This project is planned to be undertaken in private sector.

Project 16: Build 115 kV line connecting Steung Treng to Laos's power system

Scheduled Operation year: 2011

Scope: Build 115 kV line connecting Steung Treng, Suong, to Lao power system and build 115 kV substation at Steung Treng provincial town in order to import electricity form Laos to supply Steung Treng province.

Implementer: This project is under grant of WB to RGC, and RGC is providing a loan to EDC to implement the project.

Project 17: Strengthen Phnom Penh System.

Scheduled Operation year: 2012

Scope: Build 115 kV substations in eastern area of Phnom Penh (EPP). Build 115 kV transmission line connecting GS1 to NPP and NPP to EPP to meet the load of new growing areas of Phnom Penh.

Study: This project is included in 2006 Master Plan but neither detail technical study nor the feasibility study has yet been done.

Implementer: EDC shall seek fund to implement this project.

Project 18: Upgrade capacity of Phnom Penh power supply system.

Scheduled Operation year: 2015

Scope: Build 230 kV part of EPP substation in Phnom Penh, upgrade transformer capacity in WPP substation, build new substation and 230 kV transmission line connecting WPP to new substation and 230 kV transmission line connecting new substation to EPP.

Study: This project is included in 2006 Master Plan but neither detail technical study nor the feasibility study has yet been done.

Implementer: EDC shall seek fund to implement this project.

Project 19: Build 230 kV transmission line connecting Phnom Penh to Sihanoukville substation

Scheduled Operation year: 2015

Scope: Build 230 kV transmission line connecting EPP substation in Phnom Penh to Sihanoukville in order to transport electricity from Coal Fired Power Plants to be built in Sihanoukville.

Study: This project is included in 2006 Master Plan but neither detail technical study nor the feasibility study has yet been done.

Implementer: EDC shall seek fund to implement this project.

Chapter 4

Electricity Authority	of Cambodia
-	
J	Information on Licenses and Licensees
in 1	the Kingdom of Cambodia
	8

CHAPTER 4

Information on Licenses and Licensees in the Kingdom of Cambodia

4.1 Licenses for Providing Electric Power Services

As per the provisions of the Electricity Law, each electricity service provider is required to have a license issued by EAC and to abide by the provisions of the Electricity Law, its license, and regulations and procedures issued by EAC. License for providing electric power services is an authorization document confirming to the provisions of the Electricity Law, which EAC decides to grant to an individual or legal entity to give it the right to provide electric services as per the provisions stated in the license (called the Conditions of License). A license has two main parts:

- a. Decision to grant the right to provide the electric power service, and
- b. Conditions of license.

Types of licenses that can be issued and regulated by EAC are stated below:

- 1. **The Generation License:** It grants the right to generate electric power from specified generation facilities.
- 2. **The Transmission License:** It grants the right to provide transmission service. There are 2 types of Transmission License: National Transmission License and Special Purpose Transmission License.
 - i. The National Transmission License can be issued only to state power transmission company which is under the Government control, to have the right to provide the transmission service for delivering the electric power to the distribution companies and bulk power consumers throughout the Kingdom of Cambodia
 - ii. The Special Purpose Transmission License grants the right to construct, own, and operate specified transmission facilities in the Kingdom of Cambodia for the specified purpose.
- 3. **The Distribution License:** It grants the right to provide the electricity distribution services in a determined contiguous territory.
- 4. The Consolidated License: It is a license, which may be the combination of some or all types of licenses. The Consolidated License can be issued to EDC and to the isolated systems to grant the right to generate, transmit, dispatch, distribute and sale electric power to the consumers. Consolidate License can also be issued on consideration of long term planning and the objectives of Government policy to reduce long run marginal cost for supply of electricity to consumers, establish a national grid and progressively expand this grid throughout Kingdom of Cambodia.

- 5. **The Dispatch License:** It grants the right to control, manage, and operate the dispatch facilities for facilitating delivery and receiving electricity from the generation, transmission and distribution systems.
- 6. **The Bulk Sale License:** It grants the right to buy electricity from any Generation Licensee or from the power systems of neighboring countries for sale to Distribution Licensees or to large customers in one connected power system.
- 7. **The Retail License:** It grants the right to engage in the sale of electric power to consumers in a contiguous service territory.
- 8. **The Subcontract License:** It grants the right to provide electric power services according to the subcontract agreement with the existing licensee.

4.2 Licenses issued and revoked

The number of licenses issued, revoked and valid each year since 2002 is given in the Table below.

Year	Licenses issued	Licenses issued	Licenses	Licenses valid
	during the year	up to end of the	revoked during	at the end of
		year	the year	the year
2002	21	21	-	21
2003	64	85	1	84
2004	22	107	2	104
2005	16	123	1	119
2006	28	151	4	143
2007	41	192	4	180
2008	42	234	4	218
2009	33	267	2	249

Table 5: Number of Licenses issued each year

During 2009, EAC has issued 33 licenses to the electric power service providers to grant the right to provide electric power services pursuant to the Electricity Law. During 2009, the type of licenses issued to Mrs Iv Mala (License No. 211), Vonn Virek Service Co. Ltd (License no. 35) and Mr. Khoeun Sambath (License No. 61) were changed from Consolidated (Generation + Distribution) to Distribution License.

During 2009 the following two licenses were revoked:

- 1. Generation License No. 4 issued to Global Technological Support SDN BHD for providing generation service at Kampong Cham as the Power Purchase Agreement between the licensee and EDC expired
- 2. Generation License No.147 issued to Omo Energy (Cambodia) Co. Ltd for providing generation service for Eat Leang Kheng at Phum Andaung Trang, Khum Sarmor, Cheung Prey District, Kampong Cham Province as the licensee failed to install the generation facilities within a reasonable time

Types and number of licenses issued during 2009 and licenses valid at the end of year 2009 are given in the Table below.

Table 6: Types and Number of Licenses issued and valid

No.	Type of License Issued	Licenses	Issued	Revoked	Change	Valid
		valid at	during	during	of type	at end
		end of	2009	2009	during	of
		2008			2009	2009
1	Consolidated License consisting of	1				1
	Generation, Distribution and					
	National Transmission Licenses					
2	Generation License	20	1	2		19
3	Special Purpose Transmission	1	2			3
	License					
4	Consolidated License consisting of	2	1			3
	Special Purpose Transmission and					
	Distribution Licenses					
5	Distribution License	21	1		+3	25
6	Retail License	1				1
7	Consolidated License consisting of	172	28		-3	197
	Generation and Distribution					
	Licenses					
	TOTAL	218	33	2	+3-3	249

Up to 31st December 2009, EAC has issued 267 licenses to the electric power service providers to grant the right to provide electric power services pursuant to the Electricity Law, out of which 18 licenses have been revoked. The list of licenses no more valid at the end of year 2009 is given in **Annex 9**.

All the licensees except three are in the private sector. The three licensees in Government sector are (i) Electricite Du Cambodge – having Consolidate License No. 001L consisting of Generation, National Transmission and Distribution License, (ii) Electricity of Kratie Province – having Consolidate License No. 059L consisting of Generation and Distribution License, and (iii) Electricity Unit of Mondulkiri Province – having Consolidate License No. 158L consisting of Generation and Distribution License

Province wise area of supply served by Consolidated Licensees, Distribution Licensees and Retail Licensees and the normal hours of supply in these areas are given in **Annex 1**.

Maps of Provinces of Cambodia showing the location of the licensed area of supply and license number of licenses issued by EAC up to end of 2008 is given separately in this report.

4.3 Revision of Licenses

Licenses are revised from time to time as required for various reasons. 101 Licenses were revised during 2009. 27 licenses were revised for extension of their term. A licensee with infrastructure complying with technical standards and better operation and management gets a longer term for his license. As the licensees are improving their infrastructure, operation and

management, year by year the number of licenses with longer terms is increasing. The Table below gives the number of Consolidated (with Distribution) and Distribution Licenses having the same term at the end of 2007, 2008 and 2009. From the Table it can be seen that the number of Consolidated Licenses having a term of 5 years or more has progressively increase from 71 in 2007 to 128 in 2008 and 167 in 2009.

Table 7: Current Term of Licenses

Current Term	Licenses at the end of 2007		Licenses at the end of 2008		Licenses at the end of 2009	
	Number	%	Number	%	Number	%
Consolidated Li	cense					
2 years	35	23.65	23	13.14	12	5.97
3 years	28	18.92	16	9.14	14	6.97
4 years	14	9.46	8	4.57	8	3.98
5 years	45	30.41	74	42.29	102	50.75
6 years			9	5.14	12	5.97
7 years	12	8.11	22	12.57	29	14.43
8 years	2	1.35	2	1.14	2	1.00
10 years	10	6.76	15	8.57	14	6.97
15 years			3	1.71	5	2.49
Till revoked	2	1.35	3	1.71	3	1.49
Total	148	100	175	100	201	100
Average term	4.43		5.49		5.65	
Distribution Lic	ense					
5 years	2	12.50	2	9.52	3	12.00
7 years	1	6.25	2	9.52	2	8.00
10 years	4	25.00	5	23.81	7	28.00
15 years	7	43.75	11	52.38	12	48.00
20 years	1	6.25	1	4.76	1	4.00
Till revoked	1	6.25				
Total	16	100	21	100	25	100
Average term	12.63		12.33	-	11.96	

During 2009, forty one licenses were revised to enlarge the licensed area of supply and one license was revised to withdraw a part of the area of supply.

During 2009, eleven licenses were revised to add more generation capacity and seventeen licenses were revised as the existing licensee transferred the business to a new owner. Three licenses were revised to change the type of license and one license was revised to revoke the right to generate at one of the locations.

4.4 Licenses in Operation during 2009

Out of 249 licenses valid at the end of 2009, eighteen licensees, as indicated in Annex 1, Annex 3 and Annex 5 had not started regular operation till the end of 2009. Out of the balance 231 licensees in operation at end of 2009, some licensees operate in more than one province. The number of different types of licensees operating in each province is given in the table below.

Table 8: Number of different types of Licensees operating in each Province/City

No.	Name of Province/ City	Consolidate License (Gen., National Trans. and Distr.)	Generation License	Special Purpose Transmission	Consolidate License (SPTL and Distr)	Retail License	Distribution License	Consolidate License (Gen. and Distr.)	Total

24	Takeo	1	-	-	1	-	-	26	28
	Total	14	18	5	3	1	27	195	263

4.5 Efforts of Government of Cambodia, Rural Electrification Fund and EAC to assist licensees

The annual licensee meet for the year 2009 was organized by EAC on 22nd December 2009. During the meet the H.E. Minister of Industry, Mines and Energy stressed on extending the grid supply to more areas and to promote larger licensed area of supply. The representative rom EDC explained the plan of EDC for extension of the 22 kV system to cover more areas and the procedure to be followed by licensees to get connected to the 22 kV system. The Chairman EAC explained the requirement and importance of Data-Keeping by licensees. The annual licensee meet provides an excellent opportunity of interaction among licensees and with EAC.

The Rural Electrification Fund (REF) continued with its program of providing grant assistance to licensees for new connections to households in rural areas. For this program REF received funds from Government of Cambodia through loan from World Bank. During 2009, REF has disbursed grant assistance at the rate of US\$ 45 for each new connection to households in rural areas for 3,911 new connections to 28 licensees. The details are given in the Table below.

Table 9: Number of new connections for which Subsidy Disbursement was done by REF

License No.	Name of Licensee	Number of new connections for which disbursement made in 2009

Electricity Authority of Cambodia	
Chapter 5	<u> </u>
Electricity Tariff of Licensees	

CHAPTER 5 Electricity Tariff of Licensees

5.1 Electricity Tariff

The cost of electricity either from own generation or from purchase from IPP, neighboring country or other licensee is the single largest component of the cost of electric supply by licensees to the consumers. About 93% of the electricity generated by licensees in Cambodia use Diesel/HFO as fuel. Hence for the licensees generating electricity using Diesel/HFO or purchasing electricity from IPPs with cost of purchase linked to the price of fuel, the cost of electric supply is related to the cost of Diesel/HFO. In order to quickly reflect the change in the cost of fuel in the tariff for consumers in a simple and transparent manner, EAC implemented Fuel Cost Adjustment (FCA) mechanism in the tariff of licensees. Under this mechanism, the tariff for different slab rates of fuel (diesel/HFO) is determined after public consultation, so that for only a change in the cost of fuel, the corresponding tariff is fixed by EAC without the need of further public consultation. This process was implemented for some licensees in 2007. During 2008, Tariff with FCA mechanism for more licensees as well expansion of the existing table to cover wider range of fuel cost was approved by EAC and the process is continued in 2009.

The cost of generation from hydro power plant, purchases from neighboring country or from other licensees did not fluctuate much. Hence the tariff for licenses getting electric supply from such sources did not have frequent fluctuations and EAC approved the tariff without any price variation mechanism.

5.2 Electricity Tariff with Fuel Cost Adjustment Table approved by EAC

The licensees for whom EAC approved tariff with Fuel Cost Adjustment table during 2009 are given in the following Table.

Table 10: Licensees whose Tariff with Fuel Cost Adjustment Table was approved by EAC during 2009

EAC	Date of	License	Licensee for whom	Area of supply
Session	Session	Number	FCA was approved

5.3 Approval of expanded range of Fuel Cost in Fuel Cost Adjustment Table

As it was observed that the range of fuel cost in the Fuel Cost Adjustment Table, approved earlier by EAC, is in-adequate to cover the likely fuel cost in future, in 2009 EAC approved Fuel Cost Adjustment table with additional range of fuel cost for the licensees stated in the following Table.

Table 11: Licensees for whom the range of Fuel Cost was expended in the Fuel Cost Adjustment Table during 2009

EAC	Date of	License	Licensee for whom FCA	Area of supply

5.4 Electricity Tariff (without Fuel Cost Adjustment Table) approved by EAC

During 2009, EAC also approved the tariff as stated below for the following licensees.

1. Tariff of EDC for MV Consumers at Sihanoukville

The Charges for supply to MV consumers in Sihanoukville is equal to the charges for energy supplied per month plus charges for the Sub-transmission services.

The charges for energy supplied in a month = Energy actually supplied as metered x Average cost of energy received by EDC Sihanoukville during the month from all supply sources.

The charges for the Sub-transmission service shall be as given in the Table below:

Table 12: Charges for Sub-transmission in Shanoukville

Contract	kVA	5,000	4, 000	3,000	2,500	2,000	1,600	1,250	1,000	630	400	250
Demand												
Charges	US\$	15,100	12,500	9,900	8,600	7,300	6,250	5,300	4,650	3,000	2,100	1,350
for Sub-												
trans.												

Additional charges for Sub-transmission for over drawal = Drawal in excess of contract Demand in kVA x 4 US\$

The power factor of the MV Supply each month should be 0.85 or more. For power factor less than 0.85 during a month, charges for over drawal of reactive energy shall be payable as given below:

Charges for over drawal of Reactive energy in a month = Quantity of Reactive Energy over drawn in a month in kVARh x 0.025 US\$

Quantity of Reactive Energy over drawn in a month = Total reactive energy drawn in $kVARh - 0.6197 \times Active$ energy drawn in the month in kWh

2. Tariff of Licensee Electricity Skun - Chamkar Leu Enterprise for supply to Licensees and Consumers at Medium Voltage

The Charges for supply to MV consumers and licensees by Electricity Skun - Chamkar Leu Enterprise is equal to the charges for the Sub-transmission services plus charges for energy

supplied per month. The charges for the Sub-transmission services are 5.50 US Cents per kWh for Licensees and 6.50 US Cents per kWh for Bulk Consumers supplied at MV. The charges for energy supplied in a month will be equal to the tariff of EDC Kampong cham during the previous month which varies according to the cost of HFO.

5.5 Tariff of EDC during 2009

5.5.1 Tariff of EDC for Phnom Penh, Kandal Province and Provincial Town of Kampong Speu

The electricity tariff of EDC for Phnom Penh and Kandal Province and for Provincial Town of Kampong Speu as on 31st December 2009 is given in the Tables below.

Table 13: Tariff of EDC for Phnom Penh and Kandal Province

Category of Consumer	Electricity Tariff, Riels/kWh	Condition
Domestic	390	All kWh if consumption up to 50 kWh/Month
	610	All kWh if consumption between 51 to 100 kWh/Month
	720	All kWh if consumption more than 100 kWh/Month.
Embassy, NGO and Foreigner's Residence	890	
Customer paying by Government budget	780	
Commercial (business) and Industrial	Tariff rate = average cost of total electricity purchased in previous month + 3.6 US Cents/kWh	For small commercial and Industrial customers
customers	Tariff rate = average cost of total electricity purchased in previous month + 2.8 US Cents/kWh	For medium commercial and Industrial customers
	Tariff rate = average cost of total electricity purchased in previous month + 2.4 USCents/kWh	For big commercial and Industrial customers
	Tariff rate = average cost of total electricity purchased in previous month + 2.0 USCents/kWh	For commercial and Industrial Customer who is directly connected to MV

Table 14: Electricity Tariff of EDC for Provincial Town of Kampong Speu

Category of	Electricity Tariff,	Condition
Consumer	Riels/kWh	

Domestic	720	
Embassy, NGO and Foreigner's Residence	890	
Customer paid by Government budget	780	
Commercial (business) and Industrial	Tariff rate = average cost of total electricity purchased in previous month + 3.6 US Cents/kWh	For small commercial and Industrial customers
customers	Tariff rate = average cost of total electricity purchased in previous month + 2.8 US Cents/kWh	For medium commercial and Industrial customers
	Tariff rate = average cost of total electricity purchased in previous month + 2.4 USCents/kWh	For big commercial and Industrial customers
	Tariff rate = average cost of total electricity purchased in previous month + 2.0 USCents/kWh	For commercial and Industrial Customer who is directly connected to MV

The tariff for commercial and industrial consumers calculated on the basis given in the Tables above for different months of consumption is given in the following Table.

Table 15: Tariff of EDC for Phnom Penh and Kandal Province and Provincial Town of Kampong Speu for Commercial and Industrial Consumers

5.5.3 Electricity Tariff for electricity supply areas of other licensees

Information on electricity tariffs for the consumption during different months of 2009 for electricity supply areas of other licensees is given in **Annex 10**.

5.6 Electricity Tariff for sale to Licensees

With the extension of Sub-Transmission System at 22 kV, gradually more and more licensees are purchasing electricity from neighboring licensees. The details of Distribution licensees and Consolidate licensees selling electricity to other licensees and the tariff for such sale during 2009 is given in the table below.

Table 20: Electricity Tariff for sale to Licensees

Chapter 6

Report on
Generation, Import,
Transmission and Supply of
Electricity

CHAPTER 6

Report on Generation, Import, Transmission and Supply of Electricity

6.1 Electricity Generation, Import and consumption in Cambodia at a glance

During 2009, the double circuit 230 kV line from Vietnam to Phnom Penh with Grid Substations at Takeo and GS4 at Phnom Penh was commissioned. Initially Vietnam has agreed to supply a maximum of 100 MW through this inter-country connection. After this import has stabilized, EDC was able to terminate the PPA with SHC (Cambodia) International Pte Ltd for the high cost diesel generation at Phnom Penh. With the commissioning of Takeo and GS4 grid substations and import from Vietnam, EDC is gradually extending grid supply to more areas. A comparision of data on electricity Generation, Import from neighboring countries by licensees and data on consumers and consumption by them for Cambodia for the years 2008 and 2009 is given in the Table below.

Table 21: Data of Licensees operating in Electricity Sector of Cambodia at a glance

Description	Unit	Data for 2008	Data for 2009	Percentage Increase
Energy Generated	million kWh	1,484.111	1,234.594	(16.81)
Energy Imported from Thailand	million kWh	274.113	324.247	18.29
Energy Imported from Vietnam	million kWh	100.140	518.149	417.4
Total Import	million kWh	374.253	842.396	125.09
Total Energy Available	million kWh	1858.364	2076.990	11.76
Generation Capacity	kW	384,620.6	372,129	(3.25)
Number of Consumers	Number	487,426	552,521	13.35
Energy sale to consumers	million kWh	1,664.395	1,853.495	11.36
Overall Loss Percentage	Percent	10.44	10.76	

6.2 Grid connected Systems and isolated systems in Cambodia

With expansion of MV system, more and more areas, which till now were having supply from isolated system, are connected to different grid systems. By end of 2009, there were three distinct grid systems operating in Cambodia and two systems, one connected to the system in Thailand and other connected to the system in Vietnam through MV connections.

- 1. The Phnom Penh Grid System In 2009, The Phnom Penh Grid System was connected to the Vietnam Grid by double circuit 230 kV line from Chau Doc in Vietnam to grid substation at Takeo and GS4 in Phnom Penh. By end of 2009 the sources of power connected to Phnom Penh Grid System are Vietnam system at 230 kV, CETIC Hydro station at Kirirom, Khmer Electrical Power Co. Ltd and (Cambodia) Electricity Private Co. Ltd at Phnom Penh at 115 kV and Cambodia Utilities Pte Ltd., City Power Group Corporation, Colben Energy (Cambodia) Limited, SL Garment Processing (Cambodia) Ltd at Phnom Penh at 22 kV. The Phnom Penh Grid System supplies power to Phnom Penh, parts of Kandal, Kampong Speu and Takeo Provinces.
- 2. The Banteay Meanchey Grid System The 115/22 kV grid substations at Banteay Meanchey, Battambang and Siem Reap getting power supply from Thailand through 115 kV feeder forms the Banteay Meanchey Grid System. This system supplies electricity to parts of Banteay Meanchey, Battambang and Siem Reap Provinces.
- 3. The Kampong Cham Grid System 22 kV lines from the generating station of GTS Power Ltd have been extended to supply electricity to areas of EDC in Kampong Cham town and other licensees in nearby areas. This system forms the Kampong Cham Grid System.
- 4. The Vietnam MV Grid System A number of 22 kV feeders from Vietnam supply power to different areas of Cambodia near Vietnam border. Even though these 22 kV feeders are not connected to each other in Cambodia, they are connected to each other through the Vietnam Grid System and hence are considered as a grid. Some of these feeders supply the area of supply of one licensee, where as some supply the areas of more than one licensee.
- 5. The Thai MV Grid System A number of 22 kV feeders from Thailand supply power to different areas of Cambodia near Thai border. Even though these 22 kV feeders are not connected to each other in Cambodia, they are connected to each other through the Thai Grid System and hence are considered as a grid. Most of these feeders supply the area of supply of one licensee, where as some supply the areas of more than one licensee.

The data on the licensees connected to each of the grid systems at the end of the year 2009, energy input ans sale and number of consumer etc.are given in the Annexures 8, 8A, 8B, 8C and 8D. An abstract is given below.

Sl. No	Name of Grid System	Energy input to the System million kWh	Energy input in %	Energy Sold to consumers million kWh	Energy Sold to consum ers %	Number of consume rs served	consum ers served
1	Phnom Penh	1,395.241	67.18	1,245.836	67.23	254,662	46.09
	Banteay		10.92		10.58		11.39
2	Meanchey	226.793		196.016		62,935	
3	Kampong Cham	25.428	1.22	21.378	1.15	16,481	2.98
4	Vietnam at MV	148.245	7.14	134.848	7.28	51,835	9.38

Table 22: Data on Grid Systems

7	Total	2,076.990	100.00	1,853.005	100.00	552,521	100.00
6	Isolated systems	182.340	8.78	164.083	8.85	145,654	26.36
5	Thai at MV	98.942	4.76	90.845	4.90	20,954	3.79

The rest of supply systems in Cambodia are isolated systems consisting of its own generation and supplying a small area generally belonging to one licensee. The information on number of consumers, energy available and consumed for these isolated systems has been estimated province wise and given in the following Table. The contiguous area of supply of a few licensees exists in two provinces and provincewise information is not available and in these cases the provice wise data has been estimated or assumed.

Table 23: Province wise Data on isolated systems for 2009

Name of City/Province/Grid	Number of Licensees	Number of consumers	Installed Capacity on 31st Dec 2009, kW	Energy generated, kWh	Energy Sold to consumers kWh
Banteay Meanchey	5	2,470	736	402,000	291,478
Battambang	11	6,701	2,226	1,942,064	1,467,287

6.3 Generation in Cambodia

6.3.1 Generation by Type of License

Two types of licensees generate electricity in the Kingdom of Cambodia. Independent Power Producers having generation license generate and sell electricity to suppliers or industries as per Power Purchase Agreement with that supplier or industry. And Consolidated Licensees generate electricity for supply to consumers through their distribution system.

The information on operation data of individual Generation Licensees, Electricite du Cambodge and Consolidated Licensees is given in **Annex 3, Annex 6** and **Annex 7** respectively. The summery information about installed capacity and energy sent out by the Independent Power Producers, EDC and Consolidated licensees is given in **Annex 2(a)**.

The quantum of energy sent-out by the Independent Power Producers, EDC and Consolidated licensees is shown in the graphic given below.

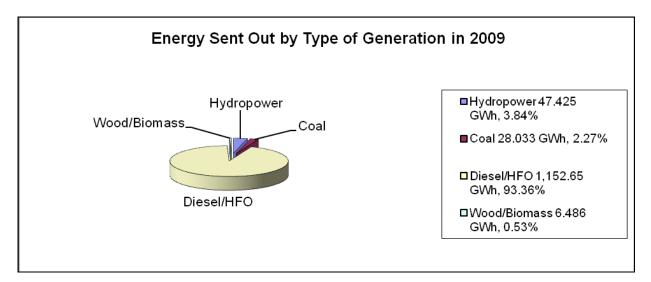

6.3.2 Generation by Type of Generation Facilities

Electricity generation facilities in the Kingdom of Cambodia for the year 2009 can be divided into 4 types: 1 - Hydropower Plants, 2 - Diesel power Plants, 3- Thermal Power Plants using coal and 4 - Plants using wood and other biomass. There are four Hydropower Plants, 1. Kirirom connected to Phnom Penh power system, 2. Ratanakiri connected to Ratanakiri power system of EDC, 3. Mondulkiri, which supplys electricity to provincial town of Mondulkiri, and 4. Khum Koh Sampeay, Seambouk District, Steung Treng Province supplying electricity to the distribution area of Mr. Seang Savot having License No. 218L. Mr. Dung Ly, supplying electricity at Ang Long Tamey (Battambang Province), SL Garment Processing (Cambodia) Ltd, supplying part of its generation to EDC Phnom Penh, and Tai Seng Import Export & Construction co., Ltd supplying power to EDC Rattanakiri use wood, agricultural products or waste as fuel for generation of electricity. Sovanna Phum Investment Co., Ltd, an IPP, having License No. 213L, uses coal to generate electricity and supplies to EDC Phnom Penh. All other power plants of the licensees are

diesel power plants using Heavy Fuel Oil (HFO) and/or Light Diesel Oil (LDO). The summery information on installed capacity and energy sent out by type of generation is given in **Annex 2(b)**.

The quantum of energy sent-out by the Independent Power Producers, EDC and Consolidated licensees classified by generation type is shown in the graphic given below.

6.4 Energy Imported from Neighboring Countries

As a result of the cooperation between the Royal Government of Cambodia and the Government of Thailand and the Government of Vietnam, Cambodia imports electricity from Thailand and Vietnam. Initially this import was only at MV (22 kV or 15 kV) but since November 2007, import from Thailand is also at 115 kV to supply to Banteay Meanchey, Battambang and Siem Reap provinces and since April 2009, import from Vietnam is also at 230 kV to supply to Takeo, Phnom Penh, Kandal and Kampong Speu provinces.

Based on the Electricity Trade Agreement between Ministry of Industry, Mines and Energy of Cambodia with the Ministry of Industry of Vietnam, government companies/organisations such as EDC, Electricity of Kratie and Electricity of Mondulkiri have signed Power Purchase Agreements with Vietnam Power No.2 for import of electricity at a number of points for supply of electricity to areas located near the Cambodia – Vietnam border either by them or through other licensees. Vietnam Power No.2 charges a fixed tariff of 6.9 US Cents per kWh for supply to Cambodia at MV. The tariff for import by EDC at 230 kV is a time of use tariff in USD/kWh being different during rainy season and rest of the year.

Some private companies have received the right from MIME to purchase electricity from Provincial Electricity Authority of Thailand for supply to areas near Cambodia – Thai border. Cost of electricity imported from Thailand at 22 kV is as per the two part – time of use tariff of Provincial Electricity Authority for the applicable category of consumer. The tariff has demand charges (Baht per kilowatt of maximum demand), energy charges (Baht per kWh with different rates for energy drawn during peak and off-peak hours), service charges (fixed charge as Baht per month), power factor penalty (Baht per excess KVAR) and Ft (change in expenses charge in Baht/kWh). Because of such tariff structure, the cost of electricity varies in different months due

to different use conditions. The tariff for import by EDC at 115 kV from Thailand consists of fixed energy charge as Baht per kWh and Ft (change in expenses charge in Baht/kWh).

Contracted capacity, quantity of electricity imported for years 2008 and 2009 by licensees and average cost per kWh in 2009 is given in the Table below:

Table 24: Contracted capacity, Energy Imported and Average Cost during 2009

Name of the	Area of Supply		Energy	Imported,	kWh	Average
Licensee		Contracted Capacity, kW	Year 2008	Year 2009	Incremental %	cost per kWh
1. Energy Im	ported from Thailand	l				In Baht

6.5 Electricity Transmission

By end of the year 2009, four high voltage lines were in operation: (1) 115kV line around Phnom Penh, (2) 115kV line from Kirirom 1 hydropower plant to Phnom Penh distribution system, (3) 115 kV line from Thai border to Banteay Meanchey – Siem Reap and Battambang and (4) 230kV line from Vietnam border to Takeo & Phnom Penh. Considering the purpose of utilization, the 115kV line around Phnom Penh is considered as operating for distribution services and 115kV transmission line transmitting electricity from Kirirom 1 hydropower plant to Phnom Penh's distribution system, 115kV transmission line transmitting electricity from Thailand to Banteay Meanchey – Siem Reap and Battambang and 230kV line transmitting electricity from Vietnam to the Phnom Penh Grid System is considered as operating for transmitting electricity.

The summary information on High Voltage Transmission and on Grid-Substation is given in Tables below.

Table 25: Information about High Voltage Transmission Lines

No.	Name of Transmission Line	Ownership	Detail Information
1	Transmission line around	EDC	Voltage: 115 kV
	Phnom Penh		Length: 82.71 Km
			Purpose: connects all 4 Grid -
			substation in Phnom Penh to
			stabilize and provide continuous of
			electricity supply
2	Transmission (Overhead Line)	EDC	Voltage: 115 kV
	Kirirom 1 – Kampong Speu –		Length: 111.24 Km
	Phnom Penh		Purpose: transmit electricity from
			Kirirom 1 hydropower plant to
			Kampong Speu and Phnom Penh
3	Transmission Line from Thai	CPTL	Voltage 115 kV
	Border to Banteay Meanchey –		Length: 221 Km

	Siem Reap and Battambang		Purpose: Import Electricity from Thailand to supply to Banteay Meanchey – Siem Reap and Battambang Areas
4	Transmission Line from Vietnam Border to Takeo to GS4 Phnom Penh	EDC	Voltage 230 kV Length: 91 Km Purpose: Import Electricity from Vietnam to supply to areas supplied by Phnom Penh Grid

Table 26: Information about High Voltage Grid-Substation

No ·	Name of Substation	Ownership	Detail Information
1	Substation No. 1 – Phnom Penh	EDC	Voltage: 115/22/15 kV Number and Size of Transformers: 1 x 30 – 50 MVA Voltage: 115/22 kV Number and Size of Transformers: 1 x 30 – 50 MVA Number of Outgoing Distribution Feeders: 15 Number of Incoming Distribution Feeders: 4 Total Number of Distribution Feeders: 19
2	Substation No. 2 – Phnom Penh	EDC	Voltage: 115/22/15 kV Number and Size of Transformers: 1 x 30 – 50 MVA Voltage: 115/22 kV Number and Size of Transformers: 1 x 30 – 50 MVA Number of Outgoing Distribution Feeders: 13 Number of Incoming Distribution Feeders: 7 Total Number of Distribution Feeders: 20
3	Substation No. 3 – Phnom Penh	EDC	Voltage: 115/22 kV Number and Size of Transformers: 2 x 30 – 50 MVA Voltage: 22/15/11 kV Number and Size of Transformers: 1 x 10 MVA Number of Outgoing Distribution Feeders: 12 Number of Incoming Distribution Feeders: 4 Total Number of Distribution Feeders: 16
4	Substation No. 4 – Phnom Penh	EDC	Voltage: 230/115 kV Number and Size of Transformers: 2 x 200 MVA and 2 x 30-50 MVA Voltage: 115/22 kV Number and Size of Transformers: 2 x 30-50 MVA
5	Substation - Takeo	EDC	Voltage: 230/22 kV Number and Size of Transformers: 1 x 16 MVA

6	Substation –	EDC	Voltage: 115/22 kV
	Kampong Speu		Number and Size of Transformers: 1 x 6.3 MW
			Number of Outgoing Distribution Feeders: 1
			Number of Incoming Distribution Feeders: 1
			Total Number of Distribution Feeders: 2
7	Substation Industrial	CPTL	Voltage: 115 kV
	Zone at Thai Border		Number of 115 kV feeder bays: 2
8	Substation Banteay	CPTL	Voltage: 115/22 kV
	Meanchey		Number of 115 kV feeder bays: 3
			Number and Size of Transformers: 1 x 25 MVA
			Number of Outgoing Distribution Feeders: 3
9	Substation Siem	CPTL	Voltage: 115/22 kV
	Reap		Number of 115 kV feeder bays: 1
			Number and Size of Transformers: 1 x 50 MVA
			Number of Outgoing Distribution Feeders: 5
10	Substation	CPTL	Voltage: 115/22 kV
	Battambang		Number of 115 kV feeder bays: 1
			Number and Size of Transformers: 1 x 25 MVA
			Number of Outgoing Distribution Feeders: 3

6.6 Electricity Distribution

In general in the Kingdom of Cambodia, the consolidated licensees and distribution licensees, having the right to distribute electricity in their authorized areas, own the electricity distribution facilities in their area.

Information on the quantity of generation, purchase, sold, loss and number of consumers of each licensee are **shown in Annex 4, Annex 5, Annexn 6** and **Annex 7**.

Annex 1
Province wise Area of supply served by Distribution, Retail and Consolidated Licensees at the end of Year 2009
