

Gender-related Sustainable Development Goal Indicators (UN Women)

Note: The list below, compiled by UN Women, includes all indicators under SDG5 as well as indicators across the framework that explicitly refer to sex, gender, women and girls and/or are specifically or largely targeted at women and girls. The criteria used in this compilation is narrow and meant to capture instances where the indicator is explicitly gender-related. A less restrictive criteria, where all indicators that are relevant for women and girls and can be disaggregated by sex are included would yield a greater listing of gender-related indicators. The Inter-Agency Expert Group on SDGs (IAEG-SDGs) has indicated that in the short-term, indicators will only be disaggregated by sex and other relevant characteristics where the target or indicator explicitly mentions disaggregation. In the long-term, all indicators where relevant will theoretically be disaggregated by sex and other characteristics, including those where sex is not specifically specified (which is referenced in a generalized statement about data disaggregation in the final global indicator framework¹).
