

Update on the Dengue situation in the Western Pacific Region

Northern Hemisphere

Cambodia

In week 46, 2019, a total of 500 dengue cases were reported to the Cambodia National Dengue Surveillance System. The number of suspected cases reported in week 46 decreased compared to the previous week. Weekly number of reported cases shows decreasing trend since week 29. (Figure 1).

Malaysia

During week 48, 2019, a total of 2,582 dengue cases with two deaths were reported in Malaysia. There has been a 17.5% increase this week compared to the previous week. The weekly number reported is higher than that reported during the same period last year (Figure 4). The cumulative number of cases reported from January until 30 November 2019 was 119,524 cases, including 164 deaths. This is higher compared to the 70,682 cases with 122 deaths reported during the same period last year.

Pacific Islands Countries

French Polynesia

During weeks 45 and 46 in 2019, there were 178 DENV-2 and 35 untyped dengue cases reported. An outbreak of DENV-2 was declared on 15 April 2019 in Tahiti and a total of 2,050 indigenous cases of DENV-2 have been reported from week 6 to week 46. Among these, most cases have been reported from Tahiti (1,673) followed by Moorea (92). There have also been a total of 563 additional cases of DENV-1 or untyped dengue (Figure 9).
