

Reflections on Data Literacy Training in Laos

Khamheng Phongkham

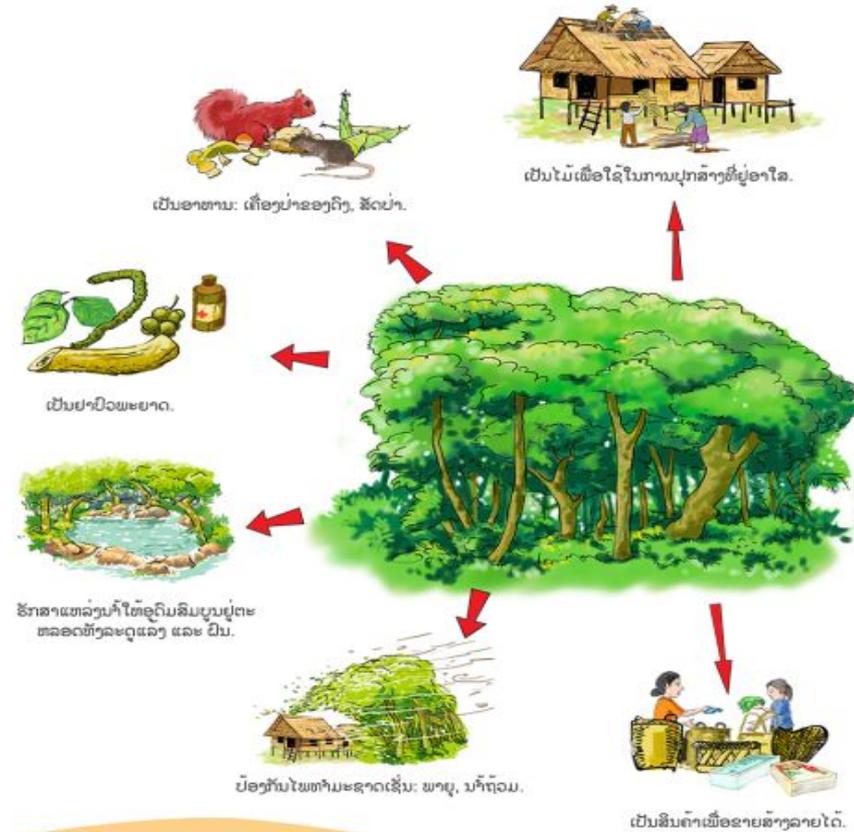

Importance of **Data Literacy Training**

1. RECOFTC and LBA are the partner on Voice for Mekong forest project to support Lao CSO FLEGT network in the forest governance.
2. The training topics and contents are very important for CSOs \ NSAs in order to improve the communication tool and data management skill among NSAs.

FINAL PROJECT OUTPUT

- Topic: Realising community forest governance model.
- Purpose: to promote the local right in the community; Forest and land right (apply native customary right in forest governance).
- Tools to support my project: Datawrapper/ Data from ODM website)

Training outcomes

- By exchanging and consult with participants, I gained new knowledge, understand more on how to use the tools to design the information or produce the visualization for presentation.
- Upgrade knowledge in accessing the information and data analysis to use the work especially information from research and case studies.
- Lessons from the training can be further adjust and organize training within my organization in the future.

Difficulties during the training

- No experience in using tools and need more time to explain and practise.
- Limited information such as: information on mining and dam (data not available/accessible)
- Training period is short compare to the content, difficult to commit to the deadline and review the lessons after the training.

Thank you

Challenges vs Opportunities

Challenges:

- ❖ Lack of data on COVID-19 in Lao Language
- ❖ Most of the data is in English
- ❖ Lockdown is the barrier of the training
- ❖ Bad internet connection
- ❖ Online training has lower effectiveness

Opportunities:

- ❖ Self-Development progress
- ❖ Get to know new data visualization tools
- ❖ Help on my studying in class

Thank you
