PROJECTS

ANGKOR'S TENEMENTS

1. **BANLUNG** (150 km²)
Gold-copper-molybdenum porphyry
2. **BANLUNG NORTH** (296 km²)
Gold in quartz stockwork in andesites;
Gold-copper-molybdenum porphyry
3. **OYADAO** (222 km²)
Gold in vertical quartz veins in gneiss
Gold in epithermal silicic-argillic breccia
4. **OYADAO SOUTH** (247 km²)
Gold in quartz stockwork in granite;
Gold in epithermal silicic-argillic breccia
5. **ANDONG MEAS** (187 km²)
Molybdenum-copper porphyry; gold in
quartz veins in granodiorite
6. **TRAPEANG KRAHAM** (175 km²)
Three separate geochemical anomalies;
all currently under investigation
7. **KOAN NHEAK** (189 km²)
Copper-gold porphyry

- Huge land package 1,448 km²
- Ability to grow our land package
